PI TAU SIGMA ANNUAL CHAPTER REPORT
2015-2016
George Washington University Phi Gamma

A. Initiations

Candidates in the top 15% of the junior and senior mechanical engineering classes were invited to join the George Washington Phi Gamma chapter in the fall and spring semesters.

Our fall initiation ceremony took place on November 2, 2015 and our spring initiation ceremony took place on March 7, 2016. A total of thirteen undergraduate students were inducted into the chapter.

B. Chapter Activities

The fall and the spring initiation ceremonies were catered by Potbelly's Sandwich Shop. This allowed current and new members of Pi Tau Sigma to mingle with members of the mechanical engineering faculty in a relaxed setting over food and drink. In February, the vice president of the chapter and a new member from the fall initiation attended the national convention at the University of Illinois. Our chapter had multiple meetings throughout the year to learn about Pi Tau Sigma, to socialize, and to plan events, as well as update the constitution.

C. About Us

The members of the Phi Gamma chapter serve as leaders throughout the engineering school and throughout the university as a whole. Several members participated in research within the mechanical engineering department this past year. Current undergraduates have internships for the summer at home and abroad in various fields including solar energy. Recent graduates are entering the aerospace and energy industries, attending graduateschool, and are being commissioned as officers in the United States Navy.

New Members
Patrick John Brehm
Andrew Goodman
Kyle Stephen Johnson
Colin Lane Kennedy
Conor Henry Lyman
Annia Mae McDonald
David Palumbo
Rahi Patel
Caleb Yates Whitehead
Yannick Baptiste
Kyle Choy
Elijah Kashi
Allen Schult

Chapter Officers for 2015-2016
Lauren Auerbach, President
Katherine Lim, Vice President
John Manning, Treasurer

Chapter Advisor
Professor Yin-Lin Shen
