PI TAU SIGMA ANNUAL CHAPTER REPORT

2010-2011

Missouri KC Phi Eta

A. Initiations

The initiations took place on 11/18/2010 and 4/8/11. The eligible candidates to be initiated arrived and were taken into a room one by one and asked a series of difficult engineering questions by all current and graduated Pi Tau Sigma members. The initiation is a humbling experience because the members are not expected to know the answers and must not be afraid to admit it.

B. Chapter Activities

The MO Phi Eta chapter held initiations in both the Fall and Spring. General business meetings were held in September, October, November, January, February, and March. The chapter sent representatives to the National Convention held in Chicago, IL. The chapter also became increasingly involved in school activities such as sponsoring the E-Week Paper Airplane Contest, as well as participating in the UMKC School of Engineering spring picnic. The final meetings involved suggestions for next year and budgeting criteria.

C. Other

Two of our members received Summa Cum Laude, one received Magna Cum Laude, one received Cum Laude. Two of our members also received Outstanding Mechanical Engineering student for their respective class. Three of our members in the graduating class are pursuing their Master's Degree and the rest are working as mechanical engineers. All of our members participate in other clubs, organizations, and teams and some even hold officer positions in those. Next year, our chapter is putting together a Freshman Survival Guide to help get more underclassmen envolved.
