PI TAU SIGMA ANNUAL CHAPTER REPORT
2012-2013
Missouri KC Phi Eta

A. Initiations

The initiations took place on 11/9/12 and 4/5/13. The eligible candidates to be initiated arrived and were taken into a room one by one and asked a series of difficult engineering questions by all current and graduated Pi Tau Sigma members. The initiation is a humbling experience because the members are not expected to know the answers and must not be afraid to admit it.

B. Chapter Activities

The MO Phi Eta chapter held initiations in both the Fall and Spring. General business meetings were held in September, October, November, January, February, and March. The chapter sent representatives to the National Convention. The chapter also became increasingly involved in school activities such as sponsoring the E-Week Mr. Engineer Pageant Contest, as well as participating in the UMKC School of Engineering spring picnic. The final meetings involved suggestions for next year, officer inductions and budgeting criteria.

C. Other

Five of our members graduated with honors. Two of our members also received Outstanding Mechanical Engineering student for their respective class. One of our members in the graduating class is pursuing her Master's Degree while working and the rest are working as mechanical engineers. All of our members participate in other clubs, organizations, and teams and some even hold officer positions in those. Next year, our chapter is planning on being more active and getting more underclassmen involved in organizations.
