PI TAU SIGMA ANNUAL CHAPTER REPORT
2011-2012
Missouri KC Phi Eta

A. Initiations

The initiations took place on 11/4/2011 and 4/6/11. The eligible candidates to be initiated arrived and were taken into a room one by one and asked a series of difficult engineering questions by all current and graduated Pi Tau Sigma members. The initiation is a humbling experience because the members are not expected to know the answers and must not be afraid to admit it.

B. Chapter Activities

The MO Phi Eta chapter held initiations in both the Fall and Spring. General business meetings were held in September, October, November, January, February, and March. The chapter sent representatives to the National Convention held in San Jose, CA. The chapter also became increasingly involved in school activities such as sponsoring the E-Week Paper Airplane Contest, as well as participating in the UMKC School of Engineering spring picnic. The final meetings involved suggestions for next year, officer inductions and budgeting criteria.

C. Other

Five of our members graduated with honors. Two of our members also received Outstanding Mechanical Engineering student for their respective class. One of our members in the graduating class is pursuing her Master's Degree while working in the field and the rest are working as mechanical engineers. All of our members participate in other clubs, organizations, and teams and many even hold officer positions in those. This year our chapter put together a Freshman Survival Guide to help get more underclassmen involved. This next year MO Phi Eta plans to join with a couple other organizations to complete a community service project in our community.
